Professional Summary

Motivated and detail-oriented Computer Engineering student with strong skills in full-stack web development and backend technologies using .NET Core and PHP. Proven leadership experience as a team leader in software development projects. Skilled in building scalable, secure applications and applying modern development practices. Seeking an opportunity to contribute technical expertise and teamwork in a dynamic, tech-driven environment.

Technical Skills

- **Languages:** C++, C#, PHP, JavaScript
 - **Backend Technologies:** .NET Core, Laravel, RESTful APIs, OOP
 - **Frontend Technologies:** HTML5, CSS3, Bootstrap, JavaScript
 - **Databases:** SQL Server, MySQL
 - **Frameworks & Tools:** Entity Framework Core, LINQ, Postman, Git, GitHub, Visual Studio, VS Code
 - **Development Practices:** Agile, Git Workflow, Debugging, API Documentation (Swagger), JWT Authentication
-

Soft Skills

- Leadership & Team Collaboration
 - Time Management
 - Analytical & Critical Thinking
 - Effective Communication
 - Fast Learner & Adaptability
 - Presentation & Public Speaking
-

Experience

Full-Stack .NET Development Trainee – DEPI Program

Digital Egypt Pioneers Initiative (DEPI), Egypt — 2025

- Completed an intensive training program covering **frontend and backend development** using .NET Core.
- Developed and deployed web applications integrating **HTML5, CSS3, JavaScript, Bootstrap**, and **.NET Core**.
- Applied **Entity Framework Core, LINQ, SQL Server**, and **RESTful API** development techniques.
- Led a team of developers as **Team Leader**, assigning tasks, reviewing code, and ensuring timely delivery.
- Practiced **Agile methodologies** and version control with Git/GitHub.

.NET Development Trainee – ITI Scholarship

Information Technology Institute (ITI), Egypt — Aug 2025

- Completed an intensive training program focused on .NET Core backend development.
- Learned and applied C# programming, OOP, Entity Framework Core, RESTful API development, and SQL Server database management.
- Built and deployed backend services with JWT authentication and documented APIs using Swagger.
- Worked with LINQ, file handling, exception handling, and performance optimization techniques.

Full-Stack PHP Development Trainee – NTI Scholarship

National Telecommunication Institute (NTI), Egypt — Aug 2025

- Acquired skills in PHP programming, Laravel framework, and MySQL database design.
- Developed full-stack web applications integrating HTML5, CSS3, JavaScript, and Bootstrap for responsive design.
- Implemented backend routing, middleware, and API integration.
- Applied version control with Git/GitHub and followed Agile development methodologies.

Education

B.Sc. in Electronics, Communications & Computer Engineering

AL-SAFWA High Institute of Engineering — Expected Graduation: 2026

Projects

TANSIQY – Graduation Project

Role: Full-Stack Developer (Frontend & Backend)

- Developed an online platform to automate university registration processes using .NET Core and modern web technologies.
- Streamlined user experience and ensured efficient data management.

Hospital Management System

Role: Backend Developer

- Built core features including patient registration, appointment scheduling, and medical records using C# and .NET Core.
- Ensured secure database handling with SQL Server and applied clean coding principles.

HR System

Role: Backend Developer

- Created a human resources management platform for employee data tracking, attendance management, and payroll processing using .NET Core and SQL Server.
- Integrated authentication, role-based access control, and reporting features.

School System

Role: Backend Developer

- Designed and developed a school management system with modules for student registration, grades management, and timetable scheduling.
- Implemented database procedures, optimized queries, and ensured data security using SQL Server.

Courses & Certifications

- **Full-Stack .NET Development – DEPI (2025)** – Team Leader for a complete full-stack project.
- **.NET Development Scholarship – ITI (2025)** – Completed intensive training in backend development using .NET Core.
- **Full-Stack PHP Development Scholarship – NTI (2025)** – Completed full-stack web development training using PHP and Laravel.
- **Team Leadership Certificate – DEPI (2025)** – Recognized for leading a software development team.
- **English Communication Skills – 4LEVEL1 (2024)** – Improved technical and business English proficiency.

Languages

- Arabic: Native
- English: Intermediate (B1-B2, continuously improving)
